

COMMUNICATION EQUIPMENT

Vendor	Description
GUARD MONITORING	
Onguard Series	
B0625	ONGUARD Kit 1 x CPU, 5 x Points, 1 x Tag, Operating software CD, User prog. Manual, 1 x serial programming cable, excludes battery.
ONGUARD CALL POINT	ONGUARD Call Point Call Point
B0626	ONGUARD Tag Tag
RDC MONITORING EQUIPMENT	
Rdc Series	
B0550	8102B/R Repeater & Base station
Single Outdoor Dipole	Single Outdoor Dipole Single Outdoor Dipole
B0546	2 Stack Antenna 2 Stack Antenna
B0547	4 Stack Antenna 4 Stack Antenna
TX 650C	TX 650C Transmitter with antenna 9 telemetry conditions (Open/Close, Panic, Alarm, Low battery, Self-test, Engineer test, Telemetry 5, Mains fail/restore)
TX 650C/PIMA	TX 650C/PIMA Transmitter with contact ID (Open/Close per user, Panic, Alarm per zone, Low battery, Self-test, Engineer test, Telemetry 5, Mains fail/restore)
TX 690C	TX 690C Transmitter with antenna 12 telemetry conditions (Open/Close, Panic, Alarm, Low battery, Self-test, Engineer test, Telemetry 1 to 5, Mains fail/restore)
Golden Max Antenna	Golden Max Antenna Golden Max Antenna
FSK MONITORING EQUIPMENT	
Fsk Series	
B0095	Informer Conventional Tx. 5 Watt 7 input radio
B0099	Informer DTMF Tx. 5 Watt 7 input radio
B0199	FSK Panic System Self-contained Panic System
B0097	Di-pole antenna Di-pole antenna
B0096	Whipp Antenna Whipp antenna
B0104	Informer 1200 Monitoring Base Station

Vendor	Description
Fsk Series (continued)	
B0103	Informer 1200 Repeater Informer 1200 Repeater
B0171	Base Station Antenna Base Station Antenna
CELLSECURE MONITORING EQUIPMENT	
Cellsecure Series	
B0549	4 X 2 SMS Communicator with GSM aerial, instructions, sim card form.
B0617	Global Remote With GSM aerial, up to 500 users for opening gates, etc.
B0616	V8 Panel with GSM aerial and 2 cables, instructions, programming instructions and Sim card form
B0570	Eagle GINA Contact ID to GPRS / SMS Communicator.
B0630	USB Interface for V8 & 4 x2 Interface cellsecure
CONTROL ROOM SOFTWARE	
Watchmanager Series	
Model S	Model S Up to 250 accounts*
Model A	Model A Up to 500 accounts*
Model B	Model B Up to 1000 accounts*
Model C	Model C Up to 1500 accounts*
Model D	Model D Up to 2000 accounts*
Model E	Model E Up to 2500 accounts*
Model U	Model U Unlimited accounts* *Please refer to discount structure
SOFTWARE UPGRADES	
Watchmanager Series	
B1343	E - A Upgrade Model E to Model A*
Upgrade	Upgrade Upgrade upward from Model A*
Network	Network Network includes first work station*
Network 1	Network 1 Additional network stations* *Please refer to discount structure

Vendor	Description
ADD-ON MODULES	
Watchmanager Series	
SMS	SMS SMS module-1st channel*
SMS	SMS Channel SMS module- Additional channels-each*
GM	GM Guard Monitoring module* <i>*Please refer to discount structure</i>
OPTIONAL EXTRAS	
Watchmanager Series	
	Annual Service Annual Service/software update contract per annum*
	Back Up Live back-up system to second computer*
	Renewal Renewal of License*
	Training Training/Consulting/Service call out per hour excluding travel*
	Software Installation Software Installation and Commissioning per day*
	Upgrade Upgrade to latest version* <i>*Please refer to discount structure</i>
UPGRADE FROM WATCHMANAGER 2	
Watchmanager Series	
	Upgrade Single user upgrade from Watchmanager 2*
	No Support NO Support Contract*
	PAID-UP Support Contract PAID-UP Support Contract* <i>*Please refer to discount structure</i>
NETWORK USER UPGRADE FROM WATCHMANAGER 2	
Watchmanager Series	
	NO Support NO Support Contract*
	PAID-UP Support PAID-UP Support Contract*
	Upgrade Upgrade to Back-up Computer* <i>*Please refer to discount structure</i>

Vendor	Description
CENTRAL STATION LINE CARD	
Pima Sentinel Series	
B0849	Sentinel Line Card 2 Lines expandable up to 4 lines, stand alone PC required
B0850	Additional Sentinel Line Card Additional Sentinel Line base station card
CENTRAL STATION EQUIPMENT	
Honeywell Series	
B0806	MX8000-3 Triple Line Base Station Supports up to a maximum of 12 line cards of 3 lines each, (hot swappable) line cards, On-board touch pad for manual operation and programming.
B0989	MX8000-3 Triple Line Card MX8000-3 Triple Line Card
B0671	Line card for CP-220 Line card for CP-220
B0709	Spare input-output board for CP-220 Spare input-output board for CP-220
B0672	Spare CPU board for CP-220 Spare CPU board for CP-220
B0710	Spare memory board for CP-220 Spare memory board for CP-220
B0663	1200 Ademco Modem 1200 Ademco Modem for use with FBII Control Panels, INCL Software
CENTRAL STATION EQUIPMENT	
Teldat Series	
B1011	Visio alarm IP receiver Capable of monitoring up to 3 000 accounts, via IP network. Monitoring of the mIP remote devices network status. Monitoring of the central network status. Sending of alarms to the automation software in CONTACT-ID format through emulation of traditional receivers, ADEMCO, SURGARD or RADIONICS.
B0984	MIP IP module Supervises the alarms panel. Detects PSTN sabotage through supervising the voltage and consequently detects when the line has been cut. Transmits LAN or WAN alarms. Simultaneously transmits alarms over IP to both a main receiver and a backup. Additional monitoring of devices over IP. Supervision protocol for remote devices © TIDP1 which permit public or private addressing with fixed or dynamic IP in the remote devices. Certified mechanisms guaranteeing immunity from attacks involving fraudulent identification. Easy local configuration through telephone or asynchronous console and remotely over IP through Telnet or from the VisorALARM receiver. Independent to the type of IP addressing: public, private, fixed or dynamic. For alarm and fire panels operating in CONTACT-ID. Completely compatible in the Alarm Reception Center with ADEMCO, SURGARD or RADIONICS receivers. Voltage range 12VDC to 24VDC. Redundancy mechanisms in IP. Traditional backup over PSTN. Supervised input , Tamper2 and one output3. IP Traffic encrypted in AES4 of up to 512 bits. Information both local and on the status through the LEDs. Preprogrammed 5 configurable events.
