DENNARD RANGE

The **2010 & 2015** are designed to provide the installer with a quick, secure and reliable camera option for fixed and zoom cameras. Ideal for any application, the robust, IP66 die-cast Aluminium housing provides the camera with the necessary protection from a demanding environment.

The **508** housing is a stylish, weatherproof, fixed attitude, vandal resistant enclosure, designed to accommodate a wide range of cameras. Designed to incorporate its own universal hidden cable bracket with built-in locking teeth.

All fixings are stainless steel button head socket screws and the window is polycarbonate which adds up to total protection. To simplify set-up and maintenance the extruded aluminium body with sunshield can slide forward and hang from the front of the camera platform. A heater and fused mains input terminal block are standard features.

The Dennard **515, 516, 517** range of environmental camera housings are designed to accommodate a wide range of camera /lens combinations and to provide protection to BS.EN 60529 Level IP 65 (no water ingress).

Insulated camera platforms with longitudinal adjustment are supplied as standard, plus window heater, thermostat, three cable glands and full sunshield. The housings are constructed from aluminium alloy, powder coated and stoved with stainless steel fixings.

DM/2010-606	Dennard Camera Housing Medium Outdoor Die-Cast Aluminum Housing, Integrated Sunshield, IP66, 310x93x80mm LWH, Includes wall mount bracket. 24Vac/12Vdc Heater.

DM/508-600 Camera Housing

Q. WHAT CAMERA HOUSING SHOULD I USE AND AT WHAT IP RATING?

A. Camera housings come in various shapes and sizes. With regard to the correct IP rating protection, this will range from dust and water ingress. This system is governed by a number of European and British standards.

IP stands for Ingress Protection.

The first number denotes the protection against ingress of solid objects.

The second number denotes the protection against ingress of liquids.

- IP55
- Protected against dust - limited ingress.
- Protection against low pressure jets of water from all directions - limited ingress permitted.
- IP65
- Protection against dust - no ingress.
- Protection against low pressure jets of water from all directions - limited ingress permitted.
- Protection against high pressure water from all directions - limited ingress permitted.
- IP66
- Protection against dust - no ingress.
- Protection against heavy seas - water from heavy seas or water projected in powerful jets shall not enter the enclosure in harmful quantities.

MEDUSA LOOK AT DOMES FROM A DIFFERENT PERSPECTIVE

Built in solid die-cast aluminium and optically correct polycarbonate window, Medusa guarantees an excellent outdoor protection (IP66). The installation of the speed dome or the network PTZ camera is absolutely innovative and extremely user-friendly either for the first set-up or for following camera services. Thanks to its top-opening, the camera is simply slot-into the enclosure, avoiding complex and difficult fastening.

- > Indoor/Outdoor installation [IP66]
- > Suitable for most of speed domes and network cameras
- > Solid aluminium construction
- > Optically correct smoked or transparent polycarbonate glass
- > Innovative user-friendly opening system
- > Wide range of accessories
